

Cletrac

TANK-TYPE TRACTOR

A Long Hard Pull And No Roads—

Over untraveled paths, through muck and mud, through ditches it seemed impossible to pass, regardless of weather, the Cletrac went on and on, making a name second to none in the oil fields for rugged endurance and bulldog determination. Small wonder the oil men prefer the Cletrac—and yet, with that endless steel track which it lays, rides over and picks up again, the way is smooth and the load seemingly lighter.

But read what Mr. J. J. Keim, of Tulsa, of the Standard Boiler & Plate-Iron Co., has to say. He tells of it plowing through sand, hauling heavy tanks, down in the Red River Country. Satisfied—More Than Satisfied!—for the Cletrac, as usual, did more than they expected.

Other Cletrac owners could tell you of immense quantities of lumber, pipes, rods and tubing, hauled through unbridged streams, over bottomless roads, filled with chuck holes. They could tell you of powerful motor trucks, mired down and stuck—pulled out, load and all, by the Cletrac.

A Record Breaker

To some of you oil men Jerry Connors' letter will read like a fairy tale. To those of you who know the Cletrac, it is just another record—a remarkable

performance which you expected the Cletrac to make and come off with flying colors.

Out into the field it went, pulling the truck and winch behind it. Then the winch and truck were put into place and the Cletrac backs upon the truck. It is but the work of a minute to connect the special sprocket which replaces the belt pulley to the winch drive shaft. Ready!

Twenty-five minutes and 1,750 feet of rods are pulled—A NEW RECORD! One hour and twenty minutes and the tubing is pulled—ANOTHER RECORD! Thirty minutes and the rods are put back—ANOTHER RECORD! One hour and ten minutes and the tubing was put back—STILL ANOTHER RECORD!

But read Jerry Connors' letter—that is the proof! You know the place—maybe you know Mr. Connors.

Cletrac on the Farm

Those of you who farm and know the power and endurance it takes to do those things described above will realize that that same power and endurance applied to farming offers you a way to make farming pay better, bigger money. See it at the show and hear the story of the Cletrac and you will understand how farming is made so much easier the Cletrac Way.

TO WHOM IT MAY CONCERN:

This is to certify that Messrs. Benham and Hopkins pulled the rods and tubing on a 1,750-foot well on the Reuben Kelly lease near Lost City for the Texas Company with the Bay City Winch and Cletrac Tractor, pulling the rods in 25 minutes, pulling the tubing in 1 hr. 20 minutes. Also putting the rods back in 30 minutes, and the tubing back in 1 hr. 10 minutes.

Dear Sirs—In regard to the Cletrac tractor, which we purchased from you about six weeks ago. We are pleased to advise we have had this tractor in use almost continually since we purchased it and with the very best results.

In the beginning when the tractor was new and we had an inexperienced driver handling it, we had a little trouble, but nothing serious and as soon as we were able to get the proper man to handle it, we had no further trouble.

We have been using this tractor in construction work in erecting 55,000-barrel tanks in the vicinity of Devol, Oklahoma, which as you know, is an extremely sandy country, being on the Red River. As a matter of fact, the machine did much better work and more than we expected and we do not hesitate in the least to recommend it to any one.

Wishing you every success in the sale of these machines, we remain,

Yours very truly,

THE STANDARD BOILER & PLATE IRON CO.
